NOON 29 JULY 1981

WAGE RATES INDEXES, AUSTRALIA, MAY 1981 (PRELIMINARY)

PHONE INQUIRIES	<i>for more information about these statistics—contact Mr Ansis Rieksts on Canberra (062) 52 6576 or any of our State offices.</i>
	<i>other inquiries including copies of publications—contact Information Services on Canberra (062) 52 6627 or in any of our State offices.</i>
MAIL INQUIRIES	<i>write to Information Services, ABS, P.O. Box 10, Belconnen, A.C.T. 2616 or any of our State offices.</i>

MAIN FEATURES

In May 1981 the weighted average minimum weekly wage rate for Australia for adult males increased by \$6.82 to \$200.54. The rate for adult females increased by \$6.42 to \$186.70.

In the 12 months ended May 1981 the adult male wage rate index rose by 12.8 per cent, approximately 91 per cent of the rise being attributable to indexation increases. For adult females the corresponding figures were 15.3 per cent and 79 per cent.

EXPLANATORY NOTES

Introduction

More information on these statistics of weighted average minimum weekly and hourly wage rates and index numbers for adult males and adult females will appear later in the monthly publication *Wage Rates, Australia* (6312.0) which also contains explanatory notes covering definitions, scope of the statistics, etc.

Definitions, etc.

2. The wage rates used in the compilation of the indexes are the lowest rates for a full week's work (excluding overtime) prescribed for particular occupations in awards or determinations of Federal or State industrial authorities; in collective agreements registered with these authorities; or in unregistered collective agreements where these are dominant in particular industries. The indexes are designed to measure movements in prescribed minimum rates of *wages* as distinct from *salaries*; those awards, etc. which relate solely or mainly to salary earners are therefore excluded. Because of delays in the receipt of notification of changes in wage rates as well as retrospective changes to rates, **all figures shown in this publication are subject**

to revision. As such revisions are made they are published in the normal monthly tables of this publication.

3. The indexes are designed to measure trends in wage rates in current awards, etc. excluding the effects of changes in the relative importance of industries, awards and occupations. The weighted average wage rates shown in these tables are therefore indexes expressed in money terms, and do not purport to be actual current averages. Similarly, neither these weighted average wage rates nor the corresponding index numbers measure the relative levels of average current wage rates as between States or industries.

4. For adult males the weekly wage rates exclude rural industry; in addition the hourly rates exclude shipping and stevedoring, for which data to compute hourly wages are not available. The weekly and hourly wage rates for adult females exclude rural industry, mining and quarrying, and building and construction.

5. The annual changes shown in Tables 1, 2 and 4 measure the percentage change from the same month for the previous year. The percentages may fluctuate from month to month owing to the timing of significant award changes.

Related publications

6. Current publications produced by the ABS are listed in the *Catalogue of Publications, Australia* (1101.0) which is available free of charge from any ABS office.

All awards, etc.	0.2	0.2	0.3	1.1	—	—	0.3

(a) This table shows the distribution of weekly wage rates included in the wage rates indexes, the weighted averages and medians of the indexes, and the percentage of index weights for wage rates equal to the various minimum wages. Comparable figures for January 1981 may be found in the January 1981 issue of this statement. (b) The median divides a distribution into two equal groups, one group having rates above the median and the other having rates below it, each group having 50 per cent of the relevant weights.
